#### **DETAILED ACTION**

### Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 24-37, drawn to substrates having biomolecules, classified in class 435, subclass 287.1.
- II. Claims 12-23, drawn to methods of arranging nanoscale biopolymerobjects, classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the substrate of Invention I can be made by coating a surface to covalently attach biomolecules with nanocylinders and does not require any selective arrangement as required by the method of Invention II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter as exemplified by their different classification, restriction for examination purposes as indicated is proper. Furthermore, a search for the inventions of all of the groups would not be co-extensive because a search indicating the *process is* novel or nonobvious

would not extend to a holding that the *product itself is* novel or nonobvious; similarly, a search indicating that *the product is* known or would have been obvious would not extend to a holding that *the process is* known or would have been obvious.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. Process claims that depend from or otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312. In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of In re Ochiai, In re Brouwer and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Notice to Comply with Requirements for Patent Applications Containing Nucleotide

Sequence And/Or Amino Acid Sequence Disclosure.

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice to Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

In particular, the application fails to comply with CFR 1.821(d), which states:

(d) Where the description or claims of a patent application discuss a sequence that is set forth in the "Sequence Listing" in accordance with paragraph (c) of this section, reference must be made to the sequence by use of the sequence identifier, preceded by "SEQ ID NO:" in the text of the description or claims, even if the sequence is also embedded in the text of the description or claims of the patent application.

The Specification discloses nucleotide sequences on pages 17 and 18. However, none of the sequences are identified by SEQ ID NOS. In addition, Applicant is required to submit a CRF and a paper copy of the Sequence Listing containing the additional sequence, an amendment directing the entry of the Sequence Listing into the specification, an amendment directing the insertion of the SEQ ID NOs into the appropriate pages of the specification and a letter stating that the content of the paper and computer readable copies are the same.

For compliance with sequence rules, it is necessary to include the sequence in the "Sequence Listing" and identify them with SEQ ID NO. In general, any sequence that is

disclosed and/or claimed as a string of particular bases or amino acids, and that otherwise meets the criteria of CFR 1.821(a), must be set forth in the "Sequence Listing." See MPEP 2422.03.

While the Examiner has made every attempt to check the Specification for sequence compliance, Applicant is <u>required</u> to carefully check the entire Specification for any and all issues regarding sequence compliance.

For the response to this Office Action to be complete, Applicant is **REQUIRED** to comply with the Requirements for Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. Failure to comply with the Requirements will be considered **nonresponsive**.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert T. Crow whose telephone number is (571) 272-1113. The examiner can normally be reached on Monday through Friday from 8:00 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ram Shukla can be reached on (571) 272-0735. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

#### Applicant(s) Application No. 10/773,753 Hamers et al **Notice to Comply** Examiner Art Unit Robert T. Crow 1634

## NOTICE TO COMPLY WITH REQUIREMENTS FOR PATENT APPLICATIONS CONTAINING NUCLEOTIDE SEQUENCE AND/OR AMINO ACID SEQUENCE **DISCLOSURES**

Applicant must file the items indicated below within the time period set in the Office action to which the Notice is attached to avoid abandonment under 35 U.S.C. § 133 (extensions of time may be obtained under

ne pr	rovisions of 37 GFR 1.130(a)).
	nucleotide and/or amino acid sequence disclosure contained in this application does not comply with equirements for such a disclosure as set forth in 37 C.F.R. 1.821 - 1.825 for the following reason(s):
at O	This application clearly fails to comply with the requirements of 37 C.F.R. 1.821-1.825. Applicant's ttention is directed to the final rulemaking notice published at 55 FR 18230 (May 1, 1990), and 1114 oG 29 (May 15, 1990). If the effective filing date is on or after July 1, 1998, see the final rulemaking otice published at 63 FR 29620 (June 1, 1998) and 1211 OG 82 (June 23, 1998).
	. This application does not contain, as a separate part of the disclosure on paper copy, a "Sequence isting" as required by 37 C.F.R. 1.821(c).
_	. A copy of the "Sequence Listing" in computer readable form has not been submitted as required by 7 C.F.R. 1.821(e).
c	. A copy of the "Sequence Listing" in computer readable form has been submitted. However, the ontent of the computer readable form does not comply with the requirements of 37 C.F.R. 1.822 and/or .823, as indicated on the attached copy of the marked -up "Raw Sequence Listing."
a	. The computer readable form that has been filed with this application has been found to be damaged nd/or unreadable as indicated on the attached CRF Diskette Problem Report. A Substitute computer eadable form must be submitted as required by 37 C.F.R. 1.825(d).
	. The paper copy of the "Sequence Listing" is not the same as the computer readable from of the Sequence Listing" as required by 37 C.F.R. 1.821(e).
∑ 7.	. Other: Nucleic acid sequences listed in the Specification lack SEQ ID Nos.
	licant Must Provide: In initial or substitute computer readable form (CRF) copy of the "Sequence Listing".
	on initial or substitute paper copy of the "Sequence Listing", as well as an amendment cifically directing its entry into the application.
	A statement that the content of the paper and computer readable copies are the same and, where cable, include no new matter, as required by 37 C.F.R. 1.821(e) or 1.821(f) or 1.821(g) or 1.825(b) or 5(d).
